Senior Product Manager

Experienced Product Manager with 6 years of building and scaling **data-driven AI-powered Enterprise SaaS products and platform**. With overall 14 years across product management and software development, I have a proven track record of **launching products** spanning Conversational AI, Decision Intelligence, Recommendation Systems, and Intelligent Workflow Automation, delivering innovative solutions that drives business growth and deliver exceptional user experiences.

Expertise in **identifying market opportunities, defining product roadmaps, and leading cross-functional teams** to achieve product goals. Adept at applying **AI/ML (DL, GenAI, Agentic)** and **Cloud technologies** to deliver impactful customer and business outcomes.

SKILLS & CORE COMPETENCIES

Artificial Intelligence - Generative AI, LLM, RAG, MCP, Agentic Workflows, Human-in-the-Loop Design, Evaluation, Responsible AI, Machine Learning, Deep Learning, Experimentation

Product Leadership - 0-to-1 Builds, Product Strategy & Roadmap, Business Case, Monetization, Pricing, Go-To-Market, Customer & Market Research

Technical - Enterprise SaaS, APIs, Data Platforms, Cloud Technologies, SQL

PROFESSIONAL EXPERIENCE

Siemens Brightly Software, Smart Infrastructure (SI BU)

Product Manager III | February 2025 - Present

- Leading Siemens's strategic **AI initiative in the Asset Lifecycle Management (ALM) portfolio**, leveraging AI to improve customer retention, product adoption, and long-term growth.
- Defined AI strategy and roadmap, identifying high-value investment opportunities synthesizing insights from 30+ enterprise customers, market trends, and product analytics to drive measurable customer and business impact.
- Launched three 0→1 AI capabilities—**Maintenance Copilot (Gen AI, Agentic Search), Smart Scheduling, and Duplicate Detection**—bringing **AI-powered assistance, optimization, and intelligence** into core product suite.
- Achieved **adoption across 50+ enterprise manufacturers** within 2 months, reducing up to 17% production downtime, improving workforce productivity, and saving downtime cost.
- **Improved AI unit economics** by 15% through model optimization and cost controls; early deployments contributed to a ~3% improvement in win rates and strengthened customer retention and expansion potential.
- Leading global cross-functional teams spanning Data Science, Engineering, UX, Sales, Marketing, and Customer Success to develop and integrate AI capabilities into maintenance workflows, driving adoption and measurable customer outcomes.

ZS Associates

Product Manager II | Oct 2021 - Feb 2025

- Led the **AI-powered commercial intelligence** product portfolio and platform for global Life Sciences organizations, enabling data-driven sales and marketing decisions in a **highly regulated industry**.
 - **Launched ZAIDYN Dynamic Targeting**, an intelligent HCP target decisioning platform adopted by 10+ global life sciences organizations, contributing to 4% to 10% incremental lift in impactable brand sales and 50% greater effectiveness in field sales calls.
 - **Scaled ZAIDYN Next Best Action** to 30+ customers, a real-time personalized omnichannel engagement recommendation system, resulting in 30% to 40% increases in HCP digital engagement rates and 20% reduction in wasteful digital outreach while boosting net response volume.
-

Keito Technologies

Product Owner | Mar 2020 - Sep 2021

- Joined an early-stage AI startup to build and commercialize AI-powered enterprise products from the ground up.
 - Built and launched Kapture — an AI-driven intelligent document processing (IDP) platform for customers in Financial and Logistics industry — growing to 5 enterprise customers with 80% reduction in processing time and error rates cut from 5% to 0.5%.
-

Tata Consultancy Services

Business Analyst & Software Developer | Oct 2009 - Feb 2020

- Designed and delivered enterprise-scale digital transformation across telecom and consumer tech — building the engineering and architecture foundations that inform product decisions today.
-
